Privacy Impact Assessment (PIA) Summary

Public Body: Alberta Employment and Immigration
Project Title: Industry Training Tracking System (ITTS)
Date Submitted: August 26, 2009
Date Accepted: September 16, 2009
OIPC TRAX File: F 5080

Project Summary:

Alberta Employment and Immigration (AE&I) in partnership with Health and Safety Association Network (HSAN) is developing the Industry Training Tracking System (ITTS) to implement a web-based system to register all Health and Safety training endorsed by HSAN and completed by the student/worker.

The development of the ITTS would create a Provincial Registry under the control and custody of AE&I, of all HSAN endorsed Health and Safety training, and all HSAN endorsed Health and Safety training completed by a student/worker that would be accessible and secured appropriately.

A key business objective of Industry is to increase worker safety, avoid the high cost of unnecessary duplicate Health and Safety training in the workforce, improve the portability of workers by tracking the approved training the student/worker has successfully completed, and making that information available to perspective employers by the student/worker.

This PIA report identified the privacy and security safeguards in place that will adequately protect the personal information involved.

The following individual can answer questions about the Privacy Impact Assessment.
