| <p>non-trivial consequences or effects.</p>  | <p>contact information, as well as email address, could be used for unsolicited telephone calls, emails and phishing, leading to an increased risk of fraud. These are significant harms.</p>   |
| <p><b>Real Risk</b><br/>The likelihood that the significant harm will result must be more than mere speculation or conjecture. There must be a cause and effect relationship between the incident and the possible harm.</p> | <p>The Organization reported that “Based on the information that is presently known... the harm could be significant because the Incident involved an unknown party maliciously gaining access to the employee's email account. It is possible that the unknown person may use the personal information in the account to cause harm to affected individuals.”</p> <p>The Organization also said “It is likely that the attacker may use the personal information to harm affected individuals... it is likely that the unauthorized individual exfiltrated the contents of the email account and has access to the emails and attachments.”</p> <p>I agree with the Organization’s assessment. The likelihood of harm resulting from this incident is increased because the personal information was compromised due to malicious action of an unknown third party (deliberate action) and phishing emails were sent. Further, the Organization reported it is likely the personal information was ex-filtrated, and as such, cannot be recovered.</p> |

**DECISION UNDER SECTION 37.1(1) OF PIPA**

Based on the information provided by the Organization and given the circumstances of the incident, I have decided that there is a real risk of significant harm to the affected individuals.

The contact and financial information at issue (credit card and banking information) could be used to cause the harms of identity theft or fraud. The contact information, as well as email address, could be used for unsolicited telephone calls, emails and phishing, leading to an increased risk of fraud. These are significant harms. The likelihood of harm resulting from this incident is increased because the personal information was compromised due to malicious action of an unknown third party (deliberate action) and phishing emails were sent. Further, the Organization reported it is likely the personal information was ex-filtrated, and as such, cannot be recovered.

I require the Organization to notify the affected individuals whose personal information was collected in Alberta in accordance with section 19.1 of the *Personal Information Protection Act Regulation* (Regulation).

I understand the Organization notified affected individuals in a letter dated September 21, 2018 in accordance with the Regulation. The Organization is not required to notify the affected individuals again.

Jill Clayton  
Information and Privacy Commissioner
